

## Softly Softly

If you're hoping to create a splash, so to speak, in your bathrooms why not offer guests an extra special touch of luxury with the Soft Bath from Ideal Standard International?

Designed by the firm's award-winning designer Marc Sadler, the ergonomic soft oval bathtub is made from a patented compound material which combines polyester and polyurethane and has been created through the process of roto-moulding.

The result is a material more durable, shiny and resilient than acrylic which is flexible for adaptable shape sensations and not only keeps water temperature for longer, it is also warmer on impact with skin. Available in a white finish, the standalone bath is 180cm x 180cm and includes an integrated chrome wall for fittings. Contact Ideal Standard at 01 456 4525 for more.
